A few days days prior to the Favette February court, I was in Lexington, where I lost my horse, saddle and bridle, and at said court I found my horse in the stray pen, where he remained till after sundown. The saddle I have never heard of. I hope any person knowing any thing of it, will make it known to Robert Macnitt, at the Keutucky Gazette Office, or to myself. It has a silver head and cant ting, silver rings, quilted in front, and plated stirrups. Made by John Brien, whose name, I think, is under the skirt. I will reward any person for their trouble for the delivery of said saddle.

March 1, 1817 .- Approved, JAMES MADISON, EXTRACTS FROM MR. WARDEN'S LET-

TERS, [continued.]
The name of Talleyrand happening to occur in the course of conversation with our French shipmates, the high opinion entertained of his talents by the Bonapartists was acknowledged without reserve On my asking at what period he was separated from the councils and confidence of Napoleon, it was replied at the invasion of Spain. I then observed that the reports in England, respecting that circumstance were correct as to time, and I presume were equally so as to the cause bis unreserved disapprobation of that bold and venturous enterprize. This met with an instant contradiction, which was followed by a most decisive assertion, that the prince of Benevento approved of the Spanish war, and founded his recommendation of that measure on his unalterable opinion, which he boldly communicated to the emperor, that his life was not secure while a Bourbon reigned in Eu-

I entered further on this subject with madame Bertrand, and she actually and most unequivocally asserted, that Talleyrand was in secret communication with Napoleon when they were last at Paris, and that he would have joined them in a a month. His proposed departure from Vienna to take the waters of Aix la Chapelle, was under the cloak of indisposition, to conceal his duplicity. 'Can you persuade yourself, madame' I said, 'that Talleyrand, if he had the inclination, possessed the power to influence the court of Vienna in favor of the son-in-law? " The court of Vienna!' she exclaimed O yes, yes: he has the capacity to influence all the courts of Europe ! If he had but joined the emperor we should at this instant be in Paris, and France never more would have changed its master.' Of this man's virtues I heard no eulogium : but you will now be a competent judge how his political talents were appreciated in the French circle on board the Northumberland.

On my asking count Bertrand, which of the French generals had amassed the greatest portion of wealth, he without the least hesitation, mentioned Massena; though, he added, they have all made considerable fortunes. Macdonald, duke of Tarentum, he appeared to think had made less than any other. Of Davoust duke D'Eckmuhl, he spoke, to our extreme astonishment, in an animated strain of panegyric, which was instantly met with an outcry from all who heard it, respecting the conduct of that officer at Hamburg, which we represented as atrocious beyond example. This he would not allow: ou the contrary, he described him a zealous correct and faithful comhumanity; as, notwithstanding his noknown to be of the most rigid kind, he did not act up to the severity of his instructions. As for his taking a bribe Bertrand declared him to be incapable of such baseness, and asserted from his own knowledge, that a very large sum had been offered him to connive at the sailing of some ships from Hamburg in the night, which he refused with the disdain of a faithful soldier and an honorable

Count de Las Cassas also took up the subject of the marshals of France, and spoke of them with little reserve. He described Massena as having been originally a fencing-master; but that previous aign in the peninsula, he was considered equal, if not superior to Bonaparte in his military capacity. From that period the count represented him as having dwindled into absolute insignificance. He is avaricious, he said, in the extreme though only one child, a daughter, to inherit his enormous wealth. He then proceeded to relate the following circumstance of the marshal, as the accidental topic of the moment:

"The preservation of the army on crossing the Danube, was boldly attributed by the soldiers who composed it, and consequently re-echoed as the opinion of the nation, to the superior skill and persevering course of Massena. It appears, that a sudden and impetuous inundation of the river had destroyed all possible communication between its right and left bank, when half the French force had passed it. The remaining half was without ammunitionw hen Massena threw himself in the village of Esling, where he withstood filteen repeated attacks of the Austrians, and effected the escape of that part of the French army from the destruction which threatened it. The eulogiums which the army and nation lavished on Massena for his conduct in the success which crowned it, partook of that clamorous character which implied no inconsiderable degree of blame and censure on Bonaparte himself, who was supposed to have felt it. But he contrived nevertheless, to dissipate the opinion, by conferring the title of prince of Esling on Massena, as the merited reward, and magnanimous acknowledgment of a service on which depended, for the moment, the success and honorable issue of the campaign. Soult, he said, was an excellent officer, and Ney brave to a fault; Suchet possesses a more powerful intelfect, with more enlarged information and political sagacity, as well as more conciliatory manners, than any of the marshals of France."

He then mentioned admiral Ganthaume, and asked what character was assigned in the English news-papers, to

LETTER,

By order of the Emperor Napoleon, Addressed by gen. count Montholon, to sir Hudson Lowe, British governor of the island of St. Hel-

General-I have received the treaty of the 2d of August, 1815, concluded between his Britanic majesty, the emperor of Austria, the emperor of Russia, and the king of Prussia, which accompanied your letter of the 23d July.

The emperor Napoleon protests against the contents of that treaty; he is not the prisoner of England. After having placed his abdication in the hands of the representatives of the nation, for the advantage of the constitution adopted by the French people, and in favor of his son, he repaired voluntarily and freely for Engand, with a view of living there as a private individual, under the protection of the British laws. The violation of every law cannot constitute a right. The person of the emperor Napoleon is actually in the power of England; but he neither has been, nor is, in the power of Austria, Russia and Prussia, either in fact or of right even according to the laws or customs of England, which never included. in the exchange of prisoners, Russians, Prussians, Austrians, Spaniards or Portuguese, though united to those powers by the treaties of alliance, and making war conjointly with them.

The convention of the 2d of August, concluded fifteen days after the emperor was in England, cannot have of right any effect. It exhibited only a speciacle of the coalition of the four greatest powers of Europe for the oppression of a single man!—a coalition which the opinion of every nation and all the principles of sound morality equality disavow.

The emperors of Austria and Russia, and the king of Prussia, having neither in fact or in right any claim over the person of the emperor Napoleon, could decide nothing respecting him.

Had the emperor Napoleon been in the power of the emperor of Austria, that prince would have recollected the relation which religion and nature had formed between father and son_relations which are never violated with impunity.

He would have recollected that Napocon had four times restored to him his throne, viz: at Leoben in 1797—at Lune ville in 1804-when his armies were under the walls of Vienna-at Presburgh in 1806, and at Vienna in 1809, when his Chatillon, the Ultimatum, which the allied at about 11 or 1200 distance a camp is es armies had posssession of the capital and that naval officer. Are they ignorant, that Napoleon at St. Helena, in ihe midst of persecution of every description, to which he opposes nothing but serenity, is greater, more sacred, and more venerable than when seated upon the first Throne in the world, where for so long a time he was the arbiter of Kings? BROTHERS-It has been the custom in all ages, and in all countries of the world, for the different tribes to celebrate the day that gave birth to some chieftain—some falsely styled warriors, distinguished alone perhaps by the multiplicity or the atrocity of their murders, or the number of their scalps, and heroic alone in conflict with women and children, have added immortality to their names—Others through crimes equally detestable, equally horrible, and committed too under the mask of divine authority, have raised themselves to the summit of all human power and greatness; have rendered their names immortal; have been reverenced, and have been worsh pped by the ignorant and supersticious of their fl-lowers—Others through political as well as religious devices, that might well be styled crimes, have had anthems of praise sung in commemoration of their names -The day and even the place that gave them birth; for
